

For item 5.1, Faculty Prioritization Rubric

Karen Reiss has requested that a link be sent to you. This is a link to a tool that provides the data that are specified on the Faculty Request/Prioritization Rubric form. This tool was assembled by Joe Hays, over the summer, to be a companion to the form, and was created in response to ASPC's May 2019 draft. One of the problems with past rubrics was the myriad ways different people interpreted/ recalculated/ massaged the data, making it difficult to compare one request with another. With access to this tool, you can experiment with the rubric using real numbers for the program/s of your choice. Please note that ASPC has had tremendous difficulty defining and/or retrieving relevant data for non-instructional faculty positions and so these are NOT included in the current tool.
