

Attending: Tim Baker, Bill Hiney, Chris Lee, Lisa Perry, Ken Fulghum

I. FOR/ NR curriculum – Tim suggested and the committee approved changing the current course discipline designators from FOR and NR to FNR. It should provide simplified student registration and articulation though it was suggested there might be some bumps in updating all of the articulation agreements.

- Articulation – Ken suggested we look at HSU's FOR 216 and update the articulation (and suggested Tim contact Steve Martin as HSU about the course). Ken also noted that Valerie Green was the articulation officer for HSU – Forestry for an attempt to get AG 17 Soils at CR to articulate for Soils 260. The course was rewritten to more closely match but nothing has been heard about HSU's status on the course. Ken also suggested we go through and update the articulation on all the courses.

-Tim mentioned trying to get the CSU – GE stamp on CR's Botany course to meet HSU's requirements (BOT 105 required at HSU and BIOL 5 at CR articulates but doesn't meet GE requirement).

-Tim also posed the idea of developing course modules that students could complete at different paces but the committee suggested that was not a good direction to take the program because of the difficulties in logistics and transfer.

- Lisa mentioned opportunities for training that might work for the FOR 1 students and she would provide more information later.

II Recruiting – Tim showed the updated program brochures recently developed with the Printing office and Lisa discussed when and where interest tables/recruiting at local schools might occur.

Next meeting – Tim will send out possible dates for the next meeting in Fall when the semester starts up again.
