## **Organization of Course**

### Participation

Students are expected to attend all lectures and labs, as attendance is required. Participation is a critical part of the learning process and is closely associated with attendance. Lack of participation and excessive absences will jeopardize the status of the student in that course objectives may not be met. For this reason, your attendance will affect your grade as follows:

- 0-4 absences – No Deduction, positive bubble impact
- >5 absences – Negative bubble impact

The only exception to this policy is for an emergency. In that case, you need to notify me in **advance** that you will be unable to attend class.

### Teaching/Learning Methodologies

Student participation is critical to the overall success of the class. Active involvement in the learning process is essential. Instructors serve as facilitators of learning and engage students in a variety of activities to promote the acquisition of business skills. Reading course materials is essential to achieving subject matter mastery, and students should come to class prepared.

Though lecture and labs are important elements of the classroom experience, additional participative activities (e.g. discussion, reflection and application) enhance the learning process. Each member of the class, instructor and student alike, is responsible for creating an effective and enjoyable learning environment.

**Note: If you are having difficulty with course content or assignments, please make an appointment with your instructor immediately.**

Students with special needs will be accommodated. Please let your instructor know about any special needs that you may have and contact College of the Redwoods' Disabled Student Programs and Services (DSPS) at 707-476-4280 for information and assistance with support services.
