

Syllabus for: Math 25	
Semester & Year:	Spring 2013
Course ID and Section Number:	E2706 (032706)
Number of Credits/Units:	4
Day/Time:	MTWTh 10:05 – 11:10 am
Location:	PS 120
Instructor's Name:	Chris Panza
Contact Information:	Office location and hours: PS 119C Phone: (707) 476-410 ext. 4856 Email: chris-panza@redwoods.edu
Course Description (catalog description as described in course outline): A study of trigonometric functions, radian measure, solution of right triangles, graphs of the trigonometric functions, inverse trigonometric functions, trigonometric identities and equations, laws of sines and cosines, solution of oblique triangles, polar coordinates, complex numbers in trigonometric form, De Moivre's theorem, and conic sections.	
Student Learning Outcomes (as described in course outline) : 1. Read, write, and speak accurately about mathematical ideas and use correct mathematical notation. 2. Use graphing technology to visualize trigonometric curves, explore mathematical concepts, and verify their work. 3. Use the theories of trigonometric functions and conic sections as fundamental problem-solving tools. 4. Demonstrate the characteristics of an effective learner, such as note-taking, critical reading, communication through writing, verbal discussions, etc. 5. Apply the mathematics of trigonometric functions to real-world problems and applications. 6. Use numerical, graphical, symbolic, and verbal representations to solve problems and communicate with others.	
Special accommodations: College of the Redwoods complies with the Americans with Disabilities Act in making reasonable accommodations for qualified students with disabilities. Please present your written accommodation request at least one week before the first test so that necessary arrangements can be made. No last-minute arrangements or post-test adjustments will be made. If you have a disability or believe you might benefit from disability related services and may need accommodations, please see me or contact Disabled Students Programs and Services. Students may make requests for alternative media by contacting DSPS.	
Academic Misconduct: Cheating, plagiarism, collusion, abuse of resource materials, computer misuse, fabrication or falsification, multiple submissions, complicity in academic misconduct, and/ or bearing false witness will not be tolerated. Violations will be dealt with according to the	

procedures and sanctions proscribed by the College of the Redwoods. Students caught plagiarizing or cheating on exams will receive an “F” in the course.

The student code of conduct is available on the College of the Redwoods website at:

<http://redwoods.edu/District/Board/New/Chapter5/AP%205500%20Conduct%20Code%20final%2002-07-2012.pdf>

Additional information about the rights and responsibilities of students, Board policies, and administrative procedures is located in the college catalog and on the College of the Redwoods homepage.

College of the Redwoods is committed to equal opportunity in employment, admission to the college, and in the conduct of all of its programs and activities.

MATH 25 – Trigonometry

E2706 • Spring 2013

PS 120 • MTWTh • 10:05am – 11:10am

Instructor: Chris Panza

Email: chris.panza.cr@gmail.edu

Website: <http://msemac.redwoods.edu/~cpanza/>

Office: PS 119C

Office Hours: By appointment (email me)

Math Lab: M 11:30am – 1:00pm, W 12:00pm – 1:30pm

Cell Phones

Cell phones are a nuisance and distraction for you, me, and your fellow students. Keep them on silent or off and put away (not on your desk) for the duration of class. The use of cell phones during class is prohibited.

Prerequisite

Math 120 with a grade of C or better or appropriate score on the assessment test.

Course Description

A study of trigonometric functions, radian measure, solution of right triangles, graphs of the trigonometric functions, inverse trigonometric functions, trigonometric identities and equations, laws of sines and cosines, solution of oblique triangles, polar coordinates, complex numbers in trigonometric form, De Moivre's theorem, and conic sections.

Course Objectives

- Read, write, and speak accurately about mathematical ideas and use correct mathematical notation.
- Use graphing technology to visualize trigonometric curves, explore mathematical concepts, and verify their work.
- Use the theories of trigonometric functions and conic sections as fundamental problem-solving tools.
- Demonstrate the characteristics of an effective learner, such as note-taking, critical reading, communication through writing, verbal discussions, etc.
- Apply the mathematics of trigonometric functions to real-world problems and applications.
- Use numerical, graphical, symbolic, and verbal representations to solve problems and communicate with others.

Textbook

Algebra & Trigonometry, 7th (purple) or *8th Ed.* (greenish) by Sullivan. I will be using the 8th edition.

Calculators

You will need a graphing calculator; I recommend a TI-83 or TI-84. Calculators are available for rent in the division office. Also, check local pawn shops, Craigslist, Ebay, etc. Cell phones will not be allowed to be used as a calculator.

Grading

Homework	35%	90 – 100%	A
Quizzes	30%	80 – 89%	B
Exams	35%	70 – 79%	C
		60 – 69%	D
		Below 60%	F

I will assign +/– grades for the top and bottom 2% of each category. I always round UP to the nearest whole percent.

Homework

All work in homework is a worthwhile investment. You are encouraged to work together on your homework assignments. I have included some suggested problems for you to get extra practice; do not turn these in. Homework will not be accepted late except for a valid reason (e.g. sick, family emergency, etc.). At the end of the semester the three lowest homework scores will be dropped from your grade.

Use an $8\frac{1}{2} \times 11$ sheet of paper, staple each individual assignment separately in the upper left corner and include your full name, class name, homework number, and instructor's name in the upper right hand corner. Use only pencil and be sure all problems are neat and readable even if you must rewrite it. Begin with the original expression/equation from the book and work in a vertical fashion with each step performed on a separate line. Include space between problems and no more than two columns of work on a sheet of paper. Always show equality where appropriate and clearly indicate your answers. Be sure to label answers such that there is sufficient context to explain the answer; a number by itself means nothing. All graphs should be on graph paper, correctly and appropriately labeled. When in doubt, copy the format I use in class or the format presented in the textbook. I will post solutions to the assigned problems online.

Quizzes

Every Thursday there will be a short quiz during the first 15 minutes of class. These quizzes will include material covered in class and the textbook from the sections for which you have turned in homework since the previous quiz. Each quiz will be worth 10 points. Be sure to show up on time with a pencil. At the end of the semester the three lowest quiz scores will be dropped from your grade. There are no make-up quizzes and no extra time is allowed; a missed quiz will count as one of your lowest scores and will be dropped. I will post solutions to the quizzes online.

Exams

There will be two Midterms (100 points each) and a cumulative Final (200 points). All exams are closed book and individual. Be sure to bring a sharp pencil and your calculator. Always clearly rewrite all applicable steps in the space provided on the exam; never refer to scratch paper or backs of pages. There are NO make-ups. In case of a severe conflict, arrangements can be made to take the exam early.

Midterm 1: Thursday, February 14, 2013, 10:05am

Midterm 2: Thursday, March 28, 2013, 10:05am

Final: Wednesday, May 8, 2013, 10:45am

Important Note: Anything not done in pencil will not be graded!

Calendar

The course calendar can be viewed online and will be updated regularly. It contains a schedule of what we will cover and all due dates for homework, quizzes, and exams. Please refer to it often.

Attendance

Attendance is very important to your overall understanding of the concepts presented in this course. You should attend all class sessions, arriving on time and leaving after the class has ended. I encourage participation and welcome all questions. If you must miss class, check with the calendar and fellow students to see what you missed.

Withdrawal After Census (WAC) Policy Instructors can now withdraw students from the class based on non-participation. If you miss too much class, you could be dropped from the class. "Too much" class is defined as anything over a week's-worth of lectures (4). Please just keep me informed as to why you are missing class and your intentions to keep attending.

Cheating

Cheating is a very serious offense and is dealt with in a serious way. Don't do it.

Assistance

If you have a documented disability or believe you could benefit from any of the services offered by Disabled Student Programs & Services (DSP&S), please contact the DSP&S office (Building T20, behind Bookstore) at 476-4280.

Tutoring

I encourage you all to enroll in MATH 52 for a 1/2 or 1 unit of credit to obtain supplementary help. It is a Credit/No Credit course that will not affect your GPA, but is counted among the 12 unit minimum for financial aid.

Other

Please turn off and remove all portable audio systems before entering class. Please be respectful your fellow classmates; refrain from using foul, crude, or disrespectful language in the classroom. This syllabus can be changed by me at any time. Canceled Class Hotline (Math & Science only): (707) 476-4210 #5
