

Syllabus for: Abnormal Psychology

Semester & Year:	Fall 2013
Course ID:	E3925 (033925)
Number of Credits/Units:	3
Day/Time:	MW 1:15-2:40
Location:	CA 113
Instructor's Name:	Deanna Herrera-Thomas
Contact Information:	Office location and hours: CA 133 Phone:476-4307 Email:Deanna-Herrerathomas@redwoods.edu

Course Description (catalog description as described in course outline):

Course Description:

An introduction to abnormal behavior, various frameworks that evaluate behavior will be presented. Psychological and cognitive disorders will be studied, including diagnostic criteria, prevalence, etiology, and treatments.

Student Learning Outcomes (as described in course outline) :

Student Learning Outcomes:

- 1. Analyze the differences between biological and psychosocial models in explaining the etiology, diagnosis, and prognosis of abnormal behavior.**
- 2. Analyze historical, ethical, legal and social concerns when defining abnormal behavior.**
- 3. Describe the DSM classification system and discuss its strengths and weaknesses.**
- 4. Analyze research in the area of abnormal psychology and synthesize information in a written paper.**

Special accommodations: College of the Redwoods complies with the Americans with Disabilities Act in making reasonable accommodations for qualified students with disabilities. Please present your written accommodation request at least one week before the first test so that necessary arrangements can be made. No last-minute arrangements or post-test adjustments will be made. If you have a disability or believe you might benefit from disability related services and may need accommodations, please see me or contact Disabled Students Programs and Services. Students may make requests for alternative media by contacting DSPS.

Academic Misconduct: Cheating, plagiarism, collusion, abuse of resource materials, computer misuse, fabrication or falsification, multiple submissions, complicity in academic misconduct, and/ or bearing false witness will not be tolerated. Violations will be dealt with according to the procedures and sanctions proscribed by the College of the Redwoods. Students caught plagiarizing or cheating on exams will receive an "F" in the course.

The student code of conduct is available on the College of the Redwoods website at:
<http://www.redwoods.edu/District/Board/New/Chapter5/Ap5500.pdf>

College of the Redwoods is committed to equal opportunity in employment, admission to the college, and in the conduct of all of its programs and activities.

Abnormal Psychology-Psych. 38 E3925

Psychological and cognitive disorders will be studied, including diagnostic criteria, prevalence, etiology, and treatments. Important Dates: Holidays (no school) Nov. 11, Nov. 28 and 29, No classes Nov. 30, Census Day, Sep. 9 and Finals Begin Dec. 9th.

Text: Understanding Abnormal Behavior 10th Ed. Sue, Sue, Sue and Sue.

Student Learning Outcomes:

Student Learning Outcomes (as described in course outline) :

Student Learning Outcomes:

- 1. Analyze the differences between biological and psychosocial models in explaining the etiology, diagnosis, and prognosis of abnormal behavior.**
- 2. Analyze historical, ethical, legal and social concerns when defining abnormal behavior.**
- 3. Describe the DSM classification system and discuss its strengths and weaknesses.**

- 4. Analyze research in the area of abnormal psychology and synthesize information in a written paper.**

If you are interested in discovering why people behave the way they do then this should be a very interesting course. We will examine the concept of abnormality and the systems used to define psychological abnormality. Please do your best to refrain from diagnosing yourself, friends and family with particular disorders addressed throughout the course. This is not always easy but remember clinical diagnostics require testing, observation, interviews and most importantly professional training with practical experience in the field. I can not guarantee confidentiality between you and other students. This means that if you share something personal in the classroom then I can not guarantee that other students will not divulge that information. I will make every effort to instill the importance of maintaining privacy in the classroom by underscoring the importance for students to refrain from sharing personal information that other students discuss within the class outside of it. I will make every effort to keep the classroom environment a safe

environment to reflect on topics presented in class, however the classroom is not an appropriate venue to examine personal mental health issues.

IMPORTANT NOTES

- The schedule is a tentative general outline of how we will cover the chapters but may not be adhered to depending upon the timing of class events, discussion and presentations.
- It is helpful you read the chapters before the lecture about them.
- You will be responsible for reading all of the assigned sections in the text. Material related to the chapters will be discussed in class in order to reinforce your understanding of the concepts, but lectures will not serve to review the contents of the textbook.
- It is strongly recommended that students with limited writing experience enroll in Eng. 152 (Writing Lab) for additional tutoring and support with writing papers.
- Please be prepared for discussion by reading your text before the lectures.

EXTREMELY IMPORTANT NOTE

- **This course includes group work and assignments and therefore will require of the student the necessary communication skills to function within a group successfully. You cannot break from your group and form your own group with other students who did the same. You cannot work on an individual project without providing written evidence to me as to why you must work independently on the project.**

****Disruptive Behavior****

Students are expected to participate in class discourse, not private discussions during class time. It is essential that students do not interrupt each other's speech (or the instructor's), yell, call each other (or the instructor names) or engage in disorderly behavior. A student attending the class under the influence of drugs or alcohol will be asked to leave. Any student disrupting class will be asked to leave and administrative follow-up will result.

You will be graded on your ability to participate and contribute to a collaborative learning environment and your ability to analyze and communicate your learning in a variety of ways outlined by the syllabus. It is your responsibility to express opinions in a respectful and non-threatening manner. If your behavior interferes with the learning of other students you will be asked to leave the class for two class periods with administrative follow-up.

Electronic devices and communications are prohibited. If you require electronic accommodations please inform the instructor. My policy on this is to offer one verbal warning and then one written warning if behavior is

repeated. If student persists in using devices then he or she will be asked to leave the class for two class periods with administrative follow-up.

Grading and Requirements

- *Exams: Worth a total of 200 points*

There will be two multiple-choice exams in addition to a final exam. Both consist of 50 multiple-choice items. The first exam will be a take-home study exam and will be designed to help you to keep up with your reading. The second test is designed to test your understanding of concepts rather than your ability to simply read the material. This second exam will be taken in the classroom and will be based on material covered in the book, lectures and video segments shown in class.

The final exam will include one essay question chosen out of ten possible questions of which you have prepared to answer. The final will be worth 100 points.

No late quizzes, No late tests and No late papers accepted unless the instructor delays turn-in dates for the entire class. No exceptions!! If you are not in class to turn in or pick-up a quiz you can not receive points for the test. You may not turn a quiz into my box in lieu of class attendance.

- *Expository Paper: Worth 50 points*

Each student is required to write a two-page reaction paper. The assignment involves selecting a theory from the text or a topic discussed in lecture that you find particularly interesting, evaluating it with current research, and relating it to a disorder of your choice. This paper is an analysis of a system of treatment, diagnosis or theory that explains or provides treatment strategies for the disorder. You may use historical treatments and theories used to explain the disorder or treatment of the disorder. This means you can write about anything from medieval concepts related to psychosis and the treatments used during that time period to present day neurological explanations for the same behavioral sets and their accompanying treatments. IF you come up with a topic that is interesting to you then run it by me for approval. In fact, all topics should be approved by me first (just ask me after class). The paper is short as I am looking for quality and not for quantity. Do not hand in a rough draft; all submitted material should be free of spelling, typographical, and grammatical errors. The reaction paper will be evaluated on the following criteria: 1) content organization; 2) your ability to write in a clear and concise manner; 3) evidence suggesting you have thought deeply about the concept(s) and its implication.

- *Group Research Paper, Presentation and Focus Groups: Worth a total of 130 points*

Each student will be assigned to an 8-10 person focus group in which you will be given the opportunity to discuss topics and to engage in classroom activities based upon the material presented in class. The group will generate one research paper that will be 3 pages in length not including the APA title and reference pages. This research paper will be presented in class. The paper and presentation are worth 130 points.

- *Attendance and Participation: 20 points*

Students are required to attend class and are expected to participate in class discussions and activities. Students will lose 5 points for every missed class.

- *Bonus points: at least 10pts.*

Bonus points are given for assignments when designated. You cannot make them up and they are utilized as a form of extra credit.

Grading Scale

372-400=A (93%+)	332-345=B(83-86%)	280-307=C(70-76%)
360-371=A-(90-92%)	320-331=B-(80-82%)	240-277=D(60-69%)
348-359=B+(87-89%)	308-319=C+(77-79%)	236and below=F(59%-??)

Week	Topic	Reading	Notes	Assignment
Week 1 Aug.26 &28	Abnormal Behavior	Chapter 1		
Sep.4	Abnormal Behavior	Chapter 1	NO class Sept. 2
