Course Description

An introduction to empirical factors that influence human behavior, child development, learning, cognition, motivation and emotion, personality, social processes, biology and pathology.

Course Objectives

This course is designed to provide you with a foundational understanding of the riveting field of psychology. Although this will not be an easy task, it need not be painful and we should have fun accomplishing this goal. Keeping up with reading and assignments is essential to your success in this course. Be assured that no one has ever died as a result of taking this course and most students who read, work responsibly alone and in their groups while keeping up with assignments will pass the class.

Lecture content does not always follow the text as the instructor reserves the right to focus discussion on areas that elaborate on specific ideas or research presented by the text in any given chapter. Please give yourself the best possible foundation for success by attending lectures and - completing all reading assignments. Take bonus points/extra credit assignments seriously and turn them in on time!

Student Commitment: This three credit-hour class will require about nine hours per week of your time. You will have to regularly attend class - four or more absences is considered excessive, carefully read textbook chapters, submit thoughtful daily writing assignments, complete a research paper, and successfully demonstrate your learning in exams. Conscientiousness, attention to details, reading, writing, and study skills are critical.

Note: Administrative procedure (AP) 5075 allows instructors to withdraw students from class for non-participation or excessive absences through the 10th week of class.

Course Texts

Weiten, W. (2013). Psychology: Themes and Variations Briefer Version (9th Ed.) Cengage.

Please note that you will be responsible for reading the material in the texts. It is critical that you read the chapter (s) before we discuss them in class. For example, you should have already read Chapter Three before the start of the third week. Although related material from the chapters will be discussed in class, course activities are intended to enhance your learning, not to simply review the reading material, so both attendance and reading are necessary for success in this class. Also, the schedule below is a general outline of how we will proceed in covering the topics, but it may not be adhered to depending upon the timing of class events, discussions and presentations. The instructor will announce in class any adjustments to the timing of topics covered or to the calendar in general.

Student Learning Outcomes will be evinced by writing assignments, take home quizzes, in-class exams, oral reports and in-class activities.

Final Exams, 5/09-5/15

Course Requirements and Grading

Students will be graded on attendance, performance on tests, class participation and class projects. Part of class participation includes acting appropriately as a responsible collaborator on group projects.

- Tests (270 points)

There will be two take-home quizzes, one midterm and a final exam. The quizzes will consist of 50 multiple-choice items each worth .5 points. The first one will be a take-home study exam and will be designed to help you keep up with the reading. The second two are designed to test your understanding of the concepts rather than whether you read the material. They will be take-home as well and will be based on material covered in the book, lectures and video segments shown in class.

The midterm (70 points) will consist of multiple-choice questions, while the final exam (100 points) will include both multiple-choice and essay questions.

Late exams will not be accepted without exception

- Group Research Paper and Focus Groups (100 points)

You will be assigned a focus group where you will be given the opportunity to discuss topics and to engage in classroom activities related to the material presented in class. This group will also generate one research paper that will be presented to the class. The paper and

presentation together are worth 100 points. Refer to research paper handout. Please begin group projects ASAP after Midterm. You will have 6 weeks to complete the project.

What if you don't want to work in a group? This is not an option unless there are serious and compelling reasons that you can demonstrate with documented evidence for being unable to participate. It will be up to the instructor to grade students separately in rare circumstances related to uneven collaboration.

- Participation (30 points)

Assignment Points:

Quiz 1= 25 Pts.

Quiz 2 =25 Pts.

Midterm = 70 Pts.

Final = 100 Pts.

Group Research Paper = 100 Pts.

Participation= 30 Pts.

Bonus points will be made available throughout the semester. If you are absent when these are announced or collected you will not be eligible for them.

Grading Scale: 372- 400=A (93%+)
360-371=A- (90-92%)
346-359=B+ (87-89%)
332-345=B (83-86%)
320-331=B- (80-82%)
308-319= C+ (77-79%)
280-307=C (70-76%)
240-279=D (60-69%)

Emergency Procedures: Please review the campus evacuation sites, including the closest site to this classroom (posted by the exit of each room) and review www.redwoods.edu/safety.asp for information on campus Emergency Procedures.

During an evacuation:

- Be aware of all marked exits from your area and building. Know the routes from your work area to the nearest exits.
- Once outside, move to the nearest evacuation point outside your building.
- Keep streets and walkways clear for emergency vehicles and personnel.
- Do not leave campus, unless it has been deemed safe by the Incident Commander or campus authorities.

I do not post grades on LMS. My experience teaching has shown me that if a student comes to speak to me and requests grades, I can provide a context for the grades and how the student can, if an issue, increase his or her score. Early grades can be deceiving in terms of overall scoring of points. This time also allows me the opportunity to encourage students, offer tips on study skills or provide useful referral information. I find that this increases persistence in my classes.
